SUBJECT Corrected Data Sheets for the FIT SAAD Investigation, May, 1982

FROM Engineering Support Branch, ESD

TO Jack Stonebraker, FIT DPO,
ERRB, AWMD

A copy of corrected data sheets for organic compounds from two soil samples collected during the subject investigation are being transmitted directly to Charles Wilson of FIT by copy of this memo. These particular samples were prepared by NEIC in their "hat" laboratory and the metals and organics data were transmitted to us at two different times. We inadvertently assigned two laboratory members to each of these samples. The analytical data sheets for metals analyses for these two samples are correct.

M. D. Lair, P.E.
